

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication

College Of Technology And Engineering

2022 - 2026

WORK EXPERIENCE

Web Development

CipherByte Technologies, Virtual

Internship • Jun 2024 - Present (1 month)

In this internship I'm working on portfolio design and a weathervue website design and I am handling with different type of problems in code.

VLSI INTERN

CODTECH IT Solution, Virtual

Internship • Jun 2024 - Present (1 month)

i learnt some basic task on verilog like : logic gate design in verilog with vlsi software and and built finite state machine (FSM) design

VLSI INTERN

CODTECH IT Solution, Virtual

Internship • Jun 2024 - Present (1 month)

currently working on vlsi and deeply interested in semiconductor electronics devices and programming

working projects as an intern

1 digital logic design with verilog

2 finite state machine (FSM) design

PROJECTS

worked on different ic projects and pcb designing

Mar 2023 - Apr 2024

<https://drive.google.com/file/d/1uRMuRcXHs82IBD6g2TXhjHQzr-9quLb/view?usp=drivesdk>

i worked on different ic projects in my labs for eg. I worked on 555 timer ic and make a project on simple clock generator and traffic light experiment also recently I m working on pcb designing and I always willing to do something creative in electronics because hardware designing is my an interesting area in future I want to work on vlsi and embedded system.

Led Chaser

Mar 2024 - Apr 2024

<https://drive.google.com/file/d/1uRMuRcXHs82IBD6g2TXhjIHQzr-9quLb/view?usp=drivesdk>

we design a minor Project of led chaser and after that print it on a board and design a printed circuit board

simple clock generator using 555 timer IC

Oct 2023 - Dec 2023

<https://drive.google.com/file/d/1ugwyw-imZIM9hcFi956Q6hx2YiD9KxfM/view?usp=drivesdk>

first we created a breadboard sample and later put it on project box with using of 555 timer ic
